

- ✓ All active conditions should be coded and have the onset date included.
- ✓ If a condition resolves, it should be moved to PMH & include a resolution date.

## Asthma-If resolved childhood asthma-code-Z87.09 (include resolution date)

| Type                       | Severity                    | Current Status            | Additional Dx of                                       |
|----------------------------|-----------------------------|---------------------------|--|
| Extrinsic-J45.xx           | Mild Intermittent-J45.2x    | Uncomplicated-J45.x0      | Exposure to environmental tobacco smoke-Z77.22         |
| Intrinsic-J45.xx           | Mild Persistent-J45.3x      | Acute Exacerbation-J45.x1 | Newborn affected by in utero exposure to tobacco-P04.2 |
| Nonallergic-J45.xx         | Moderate Persistent -J45.4x | Status Asthmaticus-J45.x2 |  |
| Allergic Bronchitis-J45.xx | Severe Persistent-J45.5x    |                           |  |
| First 3 digits             | Fourth Digit                | Fifth Digit               |  |

## Pervasive Developmental Disorders

### Step One

#### Pervasive Developmental Disorder

- F84.0-Autistic Disorder
- F84.2-Rett's Syndrome
- F84.3-Other childhood disintegrative disorder
- Dementia infantilis, Disintegrative psychosis,
  - Use additional code to identify any associated neurological condition
- F84.5-Asperger's syndrome
- F84.8-Other pervasive developmental disorders
- Overactive disorder associated with intellectual disabilities and stereotyped movements
- F84.9-Pervasive developmental disorder, unspecified
- Atypical autism

### Step Two

#### Associated Medical Condition

- F80.x-Specific DD\* of speech and language
- F81.x-Specific DD\* of scholastic skills
- F41.x-Other anxiety disorders
- F32.x-Depressive episode
- F42.x-Obsessive-compulsive disorder
- F51.x-Sleep disorders not due to a substance or known physiological condition
- R48.x-Dyslexia and other symbolic dysfunctions, not elsewhere classified
- F63.9-Impulse disorder, unspecified
- F80.82-Social pragmatic communication disorder
- F90.x-Attention-deficit hyperactivity disorders

Choose as many associated medical conditions as needed to accurately reflect the patient

Physician Tip: When the encounter is focused on treatment of conditions related to autism spectrum disorder, **first** assign codes to identify the problem or manifestation receiving therapeutic services.

## Congenital Heart Defects

*\*Although present at birth, a malformation, deformation, or chromosomal abnormality may not be identified until later in life.*

*Whenever a provider diagnosed the condition, it is appropriate to assign a code from codes Q00-Q99.*

*If a congenital malformation or deformity has been corrected, a personal history code should be used to identify the history of the malformation or deformity*

| <i>Condition</i>                      | <i>Code</i>   | <i>Personal h/o</i> | <i>Family h/o</i> | <i>Code also</i>                       |
|---------------------------------------|---------------|---------------------|-------------------|--|
| <i>Ventricular septal defect</i>      | <i>Q21.0</i>  | <i>Z87.74</i>       | <i>Z82.79</i>     | <i>Resolution date (if applicable)</i> |
| <i>Atrial septal defect</i>           | <i>Q21.1x</i> | <i>Z87.74</i>       | <i>Z82.79</i>     | <i>Resolution date (if applicable)</i> |
| <i>Atrioventricular septal defect</i> | <i>Q21.2x</i> | <i>Z87.74</i>       | <i>Z82.79</i>     | <i>Resolution date (if applicable)</i> |

## Seizure Disorders and Convulsions

| <i>Seizures / Epilepsy</i>                                  |
|---|
| <i>G40-G40.919</i>  |
| <i>Type of Seizure</i>                                      |
| <i>+</i>  |
| <i>Intractable or Non-Intractable</i>                       |
| <i>+</i>  |
| <i>Associate with or without Status Epilepticus</i>         |
| <i>+</i>  |
| <i>Code any causal conditions (ex-T36-T50, drugs)</i>       |
| <i>+</i>  |
| <i>Code any long-term treatments (Z79.899-seizure meds)</i> |
